

**BEYOND SHINE...TODAY'S FLOOR CARE
A CLEAN FLOOR WITH A "WET LOOK" SHINE IS JUST
THE BEGINNING IN TODAY'S FLOOR CARE**

Durability, slip resistance, ease of maintenance and labor saving methodology are critical in meeting the demands of today's diverse floor applications. Quality-conscious consumers, skyrocketing labor rates, slip-and-fall liability and infectious disease control and prevention represent a broad range of concerns facing today's facility managers. A successful floor care system provides a foundation for a comprehensive and effective sanitary maintenance program. Intercon's system is chemically balanced to work synergistically when used with an ultra high-speed burnisher and the proper maintenance procedures. This system delivers unmatched results, saves time and money and can eliminate your need to strip and recoat for extended periods.

So, when you're counting on your floors for more than just shine...count on us.

INNOVATIVE FLOOR CARE SOLUTIONS FOR:

Grocery Commercial Healthcare
Retail Schools

Intercon supports these fine products with training and technical support. Call today to sign up for the Intercon Institute. Offering courses in: Warewashing & Foodservice Sanitation, Institutional Laundry, and Institutional Sanitary Maintenance.

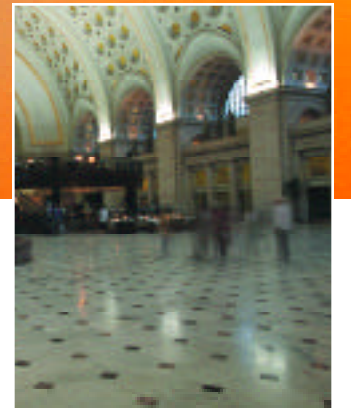

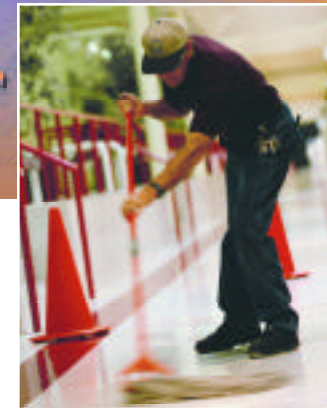

Intercon offers a comprehensive COSTFINDER tool available for you to view your end user cost and the advantages of the Intercon line of products. Call 800-325-9218 for complete details or ask your distributor to design a profile just for you.

We serve Distributors and their customers in cleaning, sanitary maintenance, industrial, foodservice, warewashing, medical and healthcare, food plant, bottling, pharmaceutical and cosmetic industries.

FLOOR CARE

Beyond Shine...Today's Floor Care

A CLEAN FLOOR WITH A “WET LOOK” SHINE IS JUST THE BEGINNING IN TODAY’S FLOOR CARE

A successful floor care system provides the foundation for a comprehensive and effective sanitary maintenance program. Intercon’s systems are chemically balanced to work synergistically when used with the proper procedures and burnishing equipment.

FLOOR STRIPPERS

It’s important to start with a good foundation...The floor surface itself must be stripped clean and free of old finish and alkaline residue that can impair new finish adhesion.

Eraser heavy duty alkaline stripper strips away multiple layers of “burnished in” finish that can take ordinary strippers several applications to remove.

Strip ‘N Go Plus no rinse, no scrub stripper breaks the molecular “film forming” bond of floor finishes and waxes. It works with or without scrubbing. Apply by mop and pick up by mop and bucket or wet vac. Remaining solution evaporates, eliminating rinsing.

- Labor saving
- Needs no rinsing
- Removes all types of finish

Interstrip concentrated machine stripper removes all types of metal interlock and thermoplastic high speed finishes. Easily picked up by mop or wet vac.

FLOOR CLEANERS

Tracked in dirt and grime not only hide the shine, but also act like “sandpaper” to grind and abrade finish top coats under heavy traffic. Our products remove the dirt, are low foaming for use in auto scrubbers, and will not dull finishes.

Daily is a high concentration neutral cleaner that will not dull or damage finished floors. It is excellent for use on any flooring surface not harmed by water alone. Combining high performance, controlled foaming and a great orange fragrance, this product is ideal for daily floor cleaning.

Dust-Up W is a water-based treatment for dust mops and cloths, which improves efficiency of the dusting operation by acting like a “magnet” for dirt particles.

FLOOR FINISHES

Intercon’s line of high performance finishes meets your need for user-friendly products with simple to apply techniques. They produce crystal clear films that are low odor and fast drying with depth, durability, slip resistance and a wet look shine.

Interplex 25% and **Interplex** thermoplastic finishes combine the ultimate in toughness with a crystal clear “wet look” gloss in a labor saving formula. Easily maintained with a pleasant low odor formula.

Series 30 metal interlock, high gloss finish is buffable at all speeds, but does not need to be buffed. It combines extreme durability with high gloss and slip resistance for the most demanding applications. Detergent resistant for improved durability.

Millennium Plus is an ultra high-speed floor finish that is the central component in our simple, effective and versatile UHS Floorcare program. Because of its unique polymer technology this finish delivers a “wet look” shine initially, exhibits no hazing during dry down and provides excellent response to UHS burnishing and restoring. Improved dry time reduces “down time” during refinishing operations.

- Easy to apply
- Dries bright
- Improved dry time

Interthane premium urethane/acrylic floor finish and seal offers state of the art performance and features distinct advantages in floor recoatability, fast drying and durability. Use of this product extends finish service life dramatically and can provide significant savings in the labor segment of the floor care budget.

FLOOR SEALERS

For very porous or irregular floor surfaces, your first coat should be a sealer to provide a smooth base surface for top coats of finish. Intercon’s products effectively treat both resilient and non-resilient flooring.

Acry-Seal sealer penetrates and seals pores in resilient flooring prior to finish application. Easy to use, it enhances the performance of most water based finishes. Non-yellowing for a long service life, this detergent resistant product is readily removed with a variety of strippers.

Inter-Seal is an extremely durable acrylic polymer seal that offers state-of-the-art performance when used for concrete, stone, marble, ceramic, tile and other non-resilient flooring. It gives equally superb results on old, new, rough, porous or smooth substrates. This sealer has a non-solvent base, is safe and easy to use, easy to clean up and has a faster drying time than many solvent-type products.

RESTORERS

Turbo 2000 restorer provides the gloss restoration and film repairing that maximizes finish durability and appearance. This versatile product can be used at a variety of buffing speeds with superior results. Can be used by either spray buffing or mop on restoring methods.

Restore ‘N More concentrate is a clear formula cleaner/maintainer that effectively cleans, shines and restores finished floor surfaces without trapping dirt. It leaves a clear, thermal-reactive film which produces a clean, “wet look” gloss at a variety of buffer speeds. Compatible with most current types of floor finishes.
