Drain Line/Grease Trap Maintenance Usage Chart

Drain Line Maintenance

<u>Pipe Size</u>	<u>Dosage</u>	<u>Frequency</u>
2"	4 oz	2 times/wk
4"	8 oz	2 times/wk
6"	12 oz	2 times/wk
8"	16 oz	2 times/wk

Grease Trap Maintenance

<u>Volume</u>	<u>Dosage</u>	<u>Frequency</u>
<25 ft ³ (<190 gal)	4-5 oz	Daily
25-75 ft ³ (190-560 gal)	8-12 oz	Daily
75-150 ft ³ (560-1120 gal)	12-20 oz	Daily

During the first month of use an increase in the prescribed dosage will allow you to establish bacteria colonies in every trouble spot. This product works best when applied at the end of the day or during the lowest drain/trap use period.

Proportion directly into drain lines, or into pipeline closest to grease traps beginning in the lowest floor of the building and work up one floor per day until the entire system is flowing freely. After the top floor is reached, treat from the top floor only.

For further information on use and application of this product, please contact your Sales Representative or call Customer Technical Service at 800.325.9218 ext. 580.
