## **MULTI-QUAT TB DISINFECTANT CLAIMS EXPANDED TO INCLUDE HEPATITIS B VIRUS (HBV) and OTHERS**

Intercon is pleased to announce several upgrades to our product MULTI-QUAT TB. Effective April 29, 2002, all sizes of MULTI-QUAT TB (#0258) will be produced using labeling which has been upgraded with several new claims demonstrating effectiveness on several organisms of particular interest to the Healthcare community. Our field experience has shown that the new claims are becoming the accepted standard of performance for disinfectants in Health Care applications requiring OSHA Bloodborne Pathogen Standard compliance.

The recently added organisms include:

- ` Hepatitis B Virus (HBV)
- ` Multiple Resistant Staphylococcus Aureus (MRSA)
- ` Vancomycin Resistant Enterococcus Faecalis (VRE)
- ` Vancomycin Intermediate Resistant Staphylococcus Aureus (VISA)
- ` Poliovirus Type 1

As before, MULTI-QUAT TB includes claims for:

- ` Mycobacterium Tuberculosis (BCG)
- ` Pseudomonas
- ` Staphylococcus Aureus
- ` Salmonella Choleraesuis
- ` Escherichia coli 0157:H7
- ` Canine Parvovirus
- ` HIV-1 (associated with AIDS)

The excellent cleaning properties of MULTI-QUAT TB remain unchanged, and the upgrades to the labeling do not add any additional cost for our Distributors.

Try MULTI-QUAT TB today. We're confident that you'll find it fits your cleaning and disinfecting needs to a "T".

If you have questions about this or any other Intercon product, please call Intercon
