MICROBIOLOGY EFFICACY DATA SUMMARIES

MULTI-QUAT 128 PLUS MULTI-QUAT 64 PLUS

Intercon is pleased to announce the release of the enclosed Microbiology Efficacy Data Summaries for our products MULTI-QUAT 128 PLUS and MULTI-QUAT 64 PLUS.

These concentrated hospital grade disinfectant cleaners combine excellent cleaning ability with a wide range of microorganism kill claims in neutral pH formulas. Non-damaging to floor finish, they are ideal for use in Healthcare applications.

Both products are latest-technology improvements over the first generation of neutral pH disinfectant cleaners. These older first-generation products would discolor mops used with them, leading to "black mop syndrome" and causing premature discarding of mops, thus driving up costs. With MULTI-QUAT 128 PLUS and MULTI-QUAT 64 PLUS, "black mop" is a thing of the past.

MULTI-QUAT 128 PLUS and MULTI-QUAT 64 PLUS also offer the benefit of an EPA registered kill claim for VRE (Vancomycin-Resistant Enterococcus Faecalis) and MRSA (Methicillin-Resistant Staphylococcus Aureus), which make them ideal products for use in any housekeeping program designed for compliance with the OSHA Bloodborne Pathogen Standard. Additionally, the microorganism kill claims include Herpes Simplex Type I and II, Trichophyton mentagrophytes, Influenza A, HIV-1 and a variety of other bacteria and viruses.

Fresh fragrances that add to your perception of clean without a heavy, masking effect are features of these products which are sure to be appreciated by the both the users of the products, the facility staff, residents or patients and visitors.

If you have questions about this or any other Intercon product, please call Intercon Technical Services at (800) 325-9218 ext. 580.
