

HARD WATER RINSE ADDITIVE

aci-dri™

Description

This concentrated, acid based rinse additive is formulated for use with all types of automatic rinse injectors. Its use will prevent water clinging to clean tableware and thereby help prevent spotting caused by water impurities from hardness and dissolved solids left behind after water evaporation. Provides rapid draining and rinsing and speeds air drying; controls foam; suspends dissolved solids to help prevent deposition.

Features...Benefits

- ConcentratedEconomical
- Hard Water Effective . . .Improved Performance
- Prevents SpottingLabor Saving
- Acidic FormulaControls Limescale
- Foam ControlledImproved Performance

Directions For Use

Adjust the rinse injector to inject the rinse additive into the final rinse water of automatic warewashing machines or other washer assemblies. Adjust concentration control to maximize results for troublesome materials such as plasticware, yet minimize concentration to maintain economy. Consult your Sales Representative for specific instructions and application set up and adjustment.

Product Properties

COLOR: Clear Blue/Green
ODOR: Mild
VISCOSITY: 25 cps
pH: 1.1
SPECIFIC GRAVITY: 1.07
WETTING: Excellent
SOLUBILITY IN WATER: Complete
HARD WATER TOLERANCE: Excellent

Safety Information

KEEP OUT OF REACH OF CHILDREN
WARNING: May cause burns to skin and eyes. Avoid contact with skin and eyes. In case of contact, flush with plenty of water for 15 minutes. Seek medical attention if irritation persists. If ingested, drink water or milk to dilute material and seek medical attention.
